Avoid the Peaks

It pays to avoid placing your Long Distance calls during the hours when the Long Distance lines are crowded—between 10 a.m. and 12 noon, 2 p.m. to 5 p.m., and 7 p.m. to 8 p.m. By avoiding these busy periods, you'll be less likely to encounter possible delays—particularly on calls to the more distant points. At the same time you'll be helping the vitally important war-time calls by reducing the congestion during the busiest hours of the day. Please call before 10 a.m. if possible.

NEW YORK TELEPHONE COMPANY

STEEL AND TELEPHONES

Two of the Nation's Vital Needs

In the mines and great steel centers of this country, men are working day and night to produce the steel for America's war machine.

From Pittsburgh, Gary, Birmingham and all the other great steel towns, pours a steady stream of the raw material that makes the guns, shells, ships and tanks of victory.

This record-breaking activity in the steel industry is one more reason why the number of telephone calls is the highest in our history. Steel men use the telephone to speed their product on its way. Their telephone calls are vital to victory. That's why you will want to cooperate in your use of the telephone.

Your Use of the Telephone in War Time

You can help us serve both you and the war effort if you will keep in mind these simple suggestions:

1. DON'T SAY "HELLO"

It's quicker to answer with your name, company, department or telephone number instead.

2. LOOK UP NUMBERS YOU'RE NOT SURE OF

Refer to your personal number list or the directory and call "Information" only when you can't find the number there.

3. KEEP PAD AND PENCIL HANDY

Having to look for them during a telephone conversation wastes time. Keeping notes avoids mistakes and confusion, so have pad and pencil by your telephone.

4. HANG UP RECEIVER CAREFULLY

A book or other object under the receiver may put your telephone "out-of-service." Replacing the receiver carefully will insure your getting all incoming calls.

5 tips

that will help you get better telephone service

1 BE SURE OF THE NUMBER

Telephone numbers have a way of getting mixed up in one's mind. You may save time — and unnecessary calls — by referring to the telephone directory first.

2 TALK DIRECTLY INTO THE MOUTHPIECE

You'll be more easily understood when telephoning if you'll talk directly into the mouthpiece of your telephone — with lips about half an inch away.

3 GIVE THEM TIME TO ANSWER

The person you are calling may not be able to answer promptly. If you wait a few seconds before hanging up, you avoid the trouble of making another call.

4 WHEN YOUR PHONE RINGS, ANSWER PROMPTLY

If you delay in answering, the person who is calling may decide you're not in—and you may miss an important call.

5 IF YOU MAKE LONG DISTANCE CALLS, AVOID THE "RUSH HOURS"—10 to 12 noon, 2 to 5 p.m., and 7 to 8 p.m. are "rush hours" for Long Distance calls to the more distant points. By calling earlier in the day you are less apt to encounter occasional delays. Please call before 10 a.m., if possible.
